Enhanced Line-up ～up to 400 HP～

High-performance A-type Screw Compressor

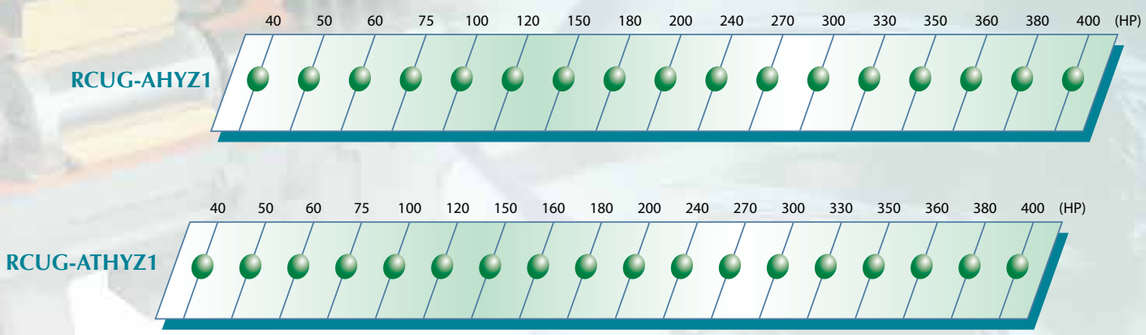
Precise Capacity Control Technology

Excellent Control Function

Highly Reliable Shell and Tube Heat Exchanger

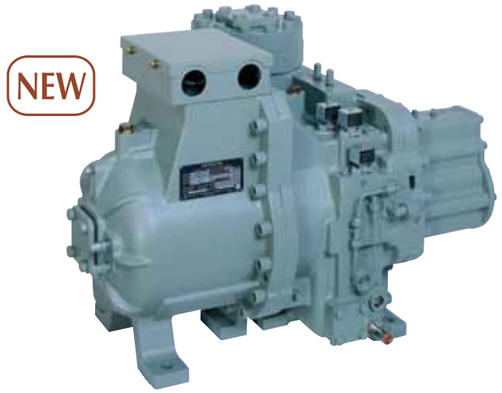
Wide Line-up

To meet the need for air conditioning systems for large facilities and the demand for higher capacity industrial cooling systems.



Technical Features

High-performance A-type Screw Compressor ～Newly Designed～



No outside pump is required due to the reliable differential-pressure oil-feeding system.

This oil-feeding system, which does not use any electrical mechanism, prevents the compressor from being damaged and maintains long-term stable operation.

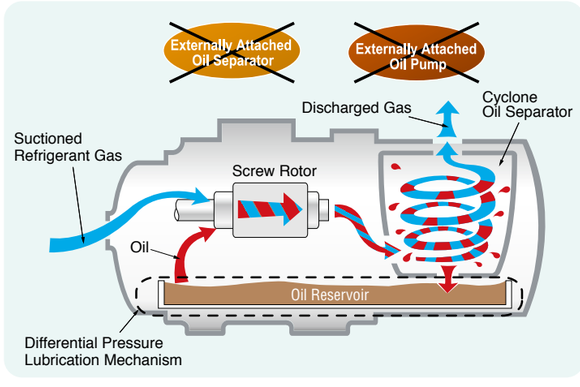
Built-in Cyclone Oil Separator

Low oil carrying-out is realized and reduction of heat transfer efficiency is minimized.

High Technology by Internal Manufacture

Because all manufacturing processes, from rotor manufacturing to unit assembly, are done internally, exceptional reliability is achieved.

☐ New Screw Compressor Operation Image



Low Vibration Level

No exclusive vibration control equipment is necessary by using low-vibration screw compressor.

Simple Structure with a Small Number of Parts

Whereas the number of main parts for the casing, compression mechanism and capacity control mechanism of a reciprocating compressor is **268**, that of a screw compressor is only **27**, just one tenth of the number !
A structure with so few parts offers high reliability and easy maintenance.

☐ Vibration Comparison

Type		Reciprocating	Screw
Comp. speed (rpm) 50/60Hz		1,430 / 1,720	**2,880 / 3,470**
Full amplitude	At leg of comp.	20−30	**5−8**
	At base frame	20	**Less than 10**
Vib. frequecy	At leg of comp.	23.8 / 28.7	**48.5 / 57.8**
	At base frame	23.8 / 28.7	**48 / 57.8**
Acceleration energy		Screw: 1/5 of reciprocating type	

Precise Capacity Control Technology

Continuous Capacity Control

The temperature of the chilled water outlet can be kept at the set temperature ±1˚C by continuous capacity control, so it is suitable for industrial use.

NOTES:

1. The nominal cooling capacities are based on the following conditions. (*1)
   Chilled Water Inlet / Outlet Temperature: 12˚C / 7˚C
   Condenser Air Inlet Temperature: 35˚C(DB)

2. The units greater than 240AHYZ1 including 240AHYZ1 consist of two modules and are separately shipped. The common chilled water piping (Filed-Supplied) between each water cooler shall be directly connected at site.

3. Water Flow
   1) RCUG240, 300, 360, 400AHYZ1
      It is necessary to control the common water flow volume to each cooler.
   2) RCUG270, 330, 350, 380AHYZ1
      The chilled water flow rate is different between No.1 & No.2 units. It is necessary to control the water flow volume of each unit with adjusting valves (Filed-Supplied).

4. It is required to connect electrical control wires between No.1 & No.2 units for the unit greater than 240AHYZ1 including 240AHYZ1.

5. ( ) marked with *2 is available by selection switch.

Working Range

NOTES:

1. The nominal cooling capacities are based on the following conditions:
   *1 Chilled Water Inlet/Outlet Temperature 12˚C/7˚C
   Condenser Air Inlet Temperature 35˚C (DB)
   *2 Chilled Water Inlet/Outlet Temperature 12˚C/7˚C
   Condenser Air Inlet Temperature 46˚C (DB)

2. The units greater than 240ATHYZ1 including 240ATHYZ1 consist of two modules and are separately shipped.(*4). The common chilled water piping (Filed-Supplied) between each water cooler shall be directly connected at site.

3. Water Flow
   1) RCUG240,300,360,400ATHYZ1
   It is necessary to control the common water flow volume to each cooler.
   2) RCUG270,330,350,380ATHYZ1
   The chilled water flow rate is different between No.1 & No.2 units.
   It is necessary to control the water flow volume of each unit with adjusting valves (Filed-Supplied) .

4. It is required to connect electrical control wires between No.1&No.2 units for the unit greater than 240ATHYZ1 including 240ATHYZ1.

5. ( )marked with *3 is available by selection switch.

6. Companion flanges are factory supplied.

7. Communication adapter connecting the unit to BMS (Building Management System) is an optional accessory, please contact with HITACHI or HITACHI distributor if required. For the details, please refer to Technical Catalog Ⅰ.
